

VADM Barry McCullough, USN (Ret)

Bernard “Barry” McCullough was named vice president of Business Strategy for Lockheed Martin’s Mission Systems & Sensors (MS2) business in November 2011. In this capacity, Mr. McCullough is responsible for working across the MS2 enterprise to analyze the business’ strengths and opportunities. He will utilize this information to develop MS2’s overall organic and inorganic growth strategies.

Mr. McCullough joined MS2 after serving more than 36 years in the U.S. Navy where he rose to the rank of Vice Admiral before retiring in October 2011. Most recently, he served as Commander, U.S. Fleet Cyber Command/Commander, U.S. 10th Fleet, where he oversaw the creation of the command and the development of Navy cyber capability from a supporting role to a supported operational domain. He served in many positions of increasing responsibility, including Deputy Chief of Naval Operations for Integration of Capabilities (OPNAV N8) and Director of Surface Warfare (OPNAV N86).

He had numerous commands at sea, including an Aegis cruiser and two carrier strike groups. He graduated from the U.S. Naval Academy with a bachelor’s of science degree in naval architecture and received a master’s of science degree in strategic resource management from the Industrial College of the Armed Forces at National Defense University.
