NAVAL BASE SAN DIEGO

HEALTH AND SAFETY STATEMENT

Updated 8/13/2021

The SNA Waterfront event is not classified as an indoor event. Attendees will either be out in the open or under tents. We do care about the health and safety of all our attendees and have redesigned both tents to increase air flow and to allow for greater space between attendees. Food service will be primarily in the open spaces, and we have changed the dining area to give more space between our guests.

As this isn't indoors, we are not making masks mandatory at this time for any vaccinated personnel while outside rather, leaving it up to each person's individual choice or company requirement. **However, if you are unvaccinated the base requires you to wear a mask anywhere on base, including outside.**

If there is a change to this policy mandated by the base, we will notify everyone. We are working to have a number of masks available for anyone who would like one. We will also set up a number of hand sanitizer stations.

Please note that if you plan to participate in any tours or go in any buildings on base masks are required indoors for all personnel.
